HCL SOFTWARE

The Cloud Native Solution Factory for Enterprise Software

Move to a cloud native architecture NOW and manage Commerce, Digital Experience, Domino, Unica, and more. With HCL Software you are always in full control of your deployment – with choice and flexibility. Our software can be installed on any Kubernetes environment – public, private, or hybrid – in minutes, on the cloud of your choice.

Capabilities	Benefits
Easy Acess to 50 Product Components. 2,000+ REST API Endpoints	Install on Kubernetes in less than an hour – no experience needed – and manage your infrastructure easier and more cost effectively than traditional methods. Simplify customization and integration of apps through APIs and minimize disruptions with proactive use of containerization
Deploy with One-Click	Accelerate enterprise software deployment from days and weeks to minutes, allowing scalability and continuous improvement for existing apps and innovation of new ones. Make high-impact changes frequently, predictably, and securely with minimal effort
Create a Cloud-Agnostic Architecture	Your Data. Your Deployment. Your Choice: Run on your cloud vendor of choice, migrate across cloud platforms, or implement a multi-cloud strategy. We have built strategic partnerships with multiple cloud vendors including AWS, Azure, Google Cloud Platform, and IBM OpenShift so you are never constrained by vendor lock-in

Make your Cloud-Native Journey Easy with HCL

Our cloud native strategy combines a technical platform rooted in the most widely adopted cloud native technologies, with the choice and flexibility that allows each of our customers to adopt cloud native in a way that best meets their own specific business objectives.

Join us on our journey – together – into the future with HCL Software's Cloud Native Solutions.
