

HCL Software

Take Advantage of Everything Domino Licensing Has to Offer

HCL Domino

HCL Domino Complete Collaboration Business (CCB) is the only license entitling customers to all Domino's features, updates and supporting programs. Switching to Domino CCB licensing enables you to realize additional benefits and features not available with older Domino licenses.

Key reasons to switch to Domino CCB licensing

Unlimited Domino Servers Deployments

Build high availability, DR and test servers - deploy in the cloud or on-prem and scale to fit your needs.

Enable Business Users to Automate Processes

Expand your development resources with Domino Leap no code - try 5 apps for free.

Share Domino Data with Other Applications

Enable Read/Write access to your Domino data via open standard APIs for app dev, integration and reporting.

Enable Advanced Group and Free-time Booking

Leverage OnTime group Calendar for your employees and avoid over-booked meetings. (Freemium version).

Never Upgrade HCL Notes Clients Again

Reduce the complexity of managing and supporting the desktop with Nomad Web.

No Cost External User Access

External anonymous access included with CCB. Utilize additional CCX licensing to support external authenticated users.

Start planning your move to Domino CCB licensing now!

The Value of Domino CCB Licensing

Reduce TCO and simplify administration

- Run Notes client in a browser - never install or upgrade a client workstation again.
- Increase your server up time – install as many high-availability servers as your redundancy policies require.
- Architect as many Disaster Recovery (DR) server installations wherever you need them.
- Install test and development servers - as many as you want.
- Deploy with Kubernetes in the cloud or on-prem and scale licensing automatically with no cost implications.
- Share your data with other apps and platforms using Domino REST APIs.
- Create as many anonymous access websites as you like, with as many anonymous users as you want.
- Authenticate external access using CCX licenses.

Make your employees more productive

- Deploy Domino Leap and reduce your development debt by ramping up citizen development resources.
- Utilize OnTime group calendar both inside and outside your organization to optimize meeting availability.
- Work offline with Nomad on your iOS or Android mobile device.

Create the ultimate Domino user experience

- Modernize and update the look and feel of existing applications with our Domino Restyle tool.
- Use HCL Nomad to extend your Domino apps to the web and mobile devices without needing to update code.

Move into the future with multi-experience native apps

- Cut your app modernization time, cost and risk in half by switching from CCB to Volt MX Go licensing.

Switch to CCB licensing now to maximize your Domino Investment!
