Operating system support

Operating Systems	Hardware	Bitness	Hardware and Software Requirements	Updates	Notes
Windows 10 Enterprise	x86-64	64	See the table.	all	
Windows Server 2016	x86-64	64		all	
Windows Server 2019	X86-64	64		all	
RHEL 7.4-7.6	X86-64	64			
RHEL 8.0	X86-64	64			

Prerequisites

Capability	Prerequisite	Version	Notes
Installation	IBM Installation Manager	1.8.6 and future fixpacks	
Licensing	Flexera		Hosted on Flexera. Refer to the software order acknowledgment letter for instructions on how to access the HCL License & Delivery Portal.
Web Servers	IBM HTTP Server	8.5.5 and future fixpacks	
	IBM WebSphere Application Server	8.5.5 and future fixpacks	
Database	Microsoft SQL Server	2017	
Database	Oracle	12cR2, 18c	
Database	DB2	11.5	

Important:

- If you are switching to the 64-bit version of HCL Traxiem from the 32-bit version, you must first uninstall the 32-bit version of Traxiem before installing the 64-bit version. Note that when you uninstall Traxiem, the CCM.preserve directory is created. This directory contains any custom settings from the Traxiem product that you uninstalled.

Traxiem System Requirements

- When you reinstall the Traxiem product on the same machine, the installation process discovers the CCM.preserve directory and presents options to let you use the preserved settings from the previous installation for the new installation or to ignore them.
- When you install the 64-bit Traxiem v 1.0.1 on a machine that previously had 32-bit ClearQuest or Traxiem 1.0.0, you should clean your Eclipse workspace. This means deleting the .Rational/clearquest folder out of your user directory.

Supported software

Capability	Software	Version	Notes
Reporting and Analysis	IBM Eclipse Business Intelligence and Reporting Tools	4.7, 4.8	DataPull reports only
Browsers	Google Chrome	37 and future versions, releases and fix packs	
	Microsoft Edge	20 and future versions, releases and fix packs	
	Microsoft Internet Explorer	11 and future fix packs	
	Mozilla Firefox	54 and future fix packs	
	Mozilla Firefox ESR	38 and future versions, releases and fix packs	

Hardware and Network Requirements

Component(s)	Disk Space	Memory	Network
Traxiem Server Components		<p>Traxiem Web Server requires 8GB RAM and 80GB hard disk space</p> <p>Additional Traxiem processes or servers located on this machine (such as license, database, or others) will require additional resources.</p> <p>For information on support for Physical Address Extension (PAE), see technote 1413461.</p>	<p>Wired connectivity to other Traxiem Servers</p> <p>100MB Full Duplex (Gigabit recommended)</p>
